Professional Summary

Self-taught Fullstack Developer with 3+ years of experience building SaaS products and production systems with React, Next.js, NestJS, and PostgreSQL. Experienced in multi-tenant architectures, REST APIs, LLM integration with tool calling, and agent-assisted development (Claude Code, MCP), across healthcare and retail. Winner of 3 awards at ETHGlobal Buenos Aires 2025.

Work Experience

Fullstack Developer (Freelance) · Naitlabs — Sep 2026 – Present

Business systems, websites, and AI automation for small businesses (naitlabs.com).

- Sales and inventory system for Aini28 (plush toy store), in production: catalog with variants, purchasing, stock, sales, installment payments, live sales, and deliveries. NestJS, Drizzle, PostgreSQL, React, R2.
- Aini28's Next.js storefront on the system's public API, with CSP, rate limiting, transactional emails, and SEO with JSON-LD.
- AI sales agent for WhatsApp (own product, deployed): answers questions, sends photos, builds orders, and checks payment screenshots against Yape notifications; PWA panel with push notifications. LLM tool calling, NestJS, React.
- Payment Ops (own product): captures Yape payments and logs them to Telegram and Google Sheets; installed in each business's Cloudflare account (Workers, D1).

Fullstack Developer · Inuba — Jan 2025 – Jun 2026

Healthcare SaaS platform used by pharmacies for clinical patient management.

- Developed and maintained the patient, treatment, questionnaire, and dashboard modules of a production SaaS used by 3-4 pharmacies, in a team of 4 developers.
- Built interfaces for clinical workflows and dynamic forms with validations tailored to medical logic.
- Integrated automated testing with Playwright and AI-assisted development (agents).

Fullstack Developer · Agencia Gato — Feb 2024 – Dec 2024

- Led the development of an accounting dashboard with server-side rendering, built from prototypes.
- Contributed to backend APIs and business logic for performance-focused web applications.

Projects

Zelterm — SaaS ERP for Retail (Personal Project) · zelterm.com

- Multi-tenant retail ERP with traceable inventory, multi-payment POS, and electronic invoicing; full architecture (frontend, backend, and database).
- Multi-agent system with Claude Code and MCP: slash commands route tasks to frontend or backend agents with domain skills, test generation, and per-layer code review.

Hackathons & Awards

ETHGlobal Buenos Aires — Hackathon · Nov 2025 · 3 prizes in the MATE Metaprotocol (EVVM) track with Hack the World

Technical Skills

Frontend: React, Next.js, TypeScript, TanStack Router/Query, Tailwind CSS, shadcn/ui
Backend: Node.js, NestJS, Express, Zod · **Databases:** PostgreSQL, Drizzle, Prisma, Supabase, Cloudflare D1
Architecture: Monorepos (Turborepo, pnpm), REST API design, multi-tenant systems, PWA
AI: LLM integration (DeepSeek, Ollama, tool calling), agent-assisted development (Claude Code, MCP)
Tools: Git, Docker, Testing (Playwright, Vitest), Cloud: Vercel, Railway, Neon, Cloudflare (Workers, D1, R2)
